Allowable Subject Matter

Claims 16-29 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a control and/or monitoring device of the pair of interactive elements. The independent claim identifies the uniquely distinct features "a state encoder operative to produce a status signal representative of a logical or analogical state affecting the elements of the first pair of interactive elements, the state encoder including at least a permanent magnet carried by the electronic label and a magnetic field sensor carried by the reader". The cited prior art fail to anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of Mercure et al. (US 2006/0289640), Hammond (US 6,980,100), Dames (US 6,323,769) and Watters et al. (US 6,617,963) are cited to show a variety of RFID monitoring devices.
